## A Trip to the West.

SOUTH BRAINTREE, Aug. 24, 1874.  
Mr. Editor.—Having had a desire for many years past to see the "Great West," I was providentially favored with an opportunity and left home in the 7 1/2 train at Aug. 5th, in the morning, and Boston at 8 1/2 in the Express train for Albany. Nothing of particular interest occurred on the way thither, the cars moved at a rapid rate, and forcibly reminded me of the contrast when I rode from Boston to Albany in 1827 in a stage coach and were two days and part of two nights on the road. Now the trip is made in 6 1/2 hours with ease. Our train arrived at Worcester at 10, and Springfield at 11 1/2. Soon after crossing the Connecticut the Berkshire hills made their appearance, then the Green mountain range with its lofty summits and deep gorges. Although I had passed them many times before their majesty and grandeur never appeared to better advantage.

After leaving Pittsfield our course was about Southwest to Richmond around the South end of the mountain, then Northwest into Canaan, N. Y., through the tunnel, Chatham, Kinderhook, &c., to Albany, where we arrived at 3 3/4 o'clock P. M. Our transit through the city was rapid in a bus to the Susquehanna Railroad Depot, where we found the cars just starting out for Binghamton, and it was with the utmost exertion that we caught hold of the iron rail of the cars and saved ourselves, a porter kindly catching our carpet-bags and putting them aboard. It was my purpose before leaving home to have stopped several hours in this old Dutch City whose streets were so familiar to me upward of forty years ago, but the connection between the two Railroads was so close that privilege was denied me. I noticed that most of the old buildings which stood with gable end to the street and tiled roofs were removed, the streets many of them widened & a more elegant class of stores and dwellings erected. The new Capitol on the hill at the head of State street now in process of erection I was unable to see, but I saw a photograph of it and should judge it will be when finished, the most elegant and most costly of any in the United States commensurate with the vast resources of the Empire State. After leaving Albany the course of the railroad was South westerly through New Scotland, Guilderland, Esperance and many other pleasant towns in the region of the Helderberg, (so called) when the country soon became changed from an even to an uneven surface, and as the cars passed rapidly along, high hills, deep valleys and mountains were seen on either side. The scenery up through the Susquehanna valley is beautiful. Mountains, hills and deep precipices abound at every point of the compass; occasionally rich fields of grain are seen waving in the breeze, then a large village with fine churches meet the eye. Schoharie River is traced by the railroad nearly to its source, then along the banks of the noble Susquehanna we pass until night overtakes us; we strain our eyes to catch the last glimpse of the twilight and the blue hill top on either side of this picturesque valley. We passed through the tunnel of the mountain about 8 1/2 o'clock, but the darkness prevented our seeing it. We were 4 1/2 minutes passing through. From this point the cars rolled rapidly on and we arrived at Binghamton at 9 1/2 P. M., having rode 350 miles since leaving home, took lodgings at the Lewis House near the Depot and retired early to rest.

Yours truly,

E.

[To be continued.]

## For the Gazette.

## Keeping Items.

NO. 1.

This is the age of free thought, and hens; and the chances that one will have a female rooster scratching in his garden and a radical idea dusting its unfettered plumage on the sunny slopes of his intellect are about equally certain. In either case some valuable root is very likely to be scratched out of existence, while the weeds are in no wise hindered in their endeavors to possess the land.

In here there is a happy blending of foreordination and free will, and through them the harmonious working of these two doctrinal enemies is exemplified. It was foreordained that you should keep hens, yet you have your choice in the matter; you may keep your neighbor's, or, if you prefer, you may keep his and your own, also. The predestination comes in, as you will notice, (and doubtless have noticed many times) with your neighbor's hens, which is every day after your garden is planted. The do-as-you-please is served up in the second statement above, and you can easily illustrate its correctness by placing a coop at your back door and stocking it with fowl. But, of course, you will not do this unless you choose to do it. You can act your own good pleasure as to having a hen-house, on your premises and yet not thwart the decree of fate that you must keep hens.

Having, in accordance with eternal purposes, for several years kept our next door's hens, we resolved in obedience to a sudden impulse of wilful liberty to keep our own.

Not despising the day of small things we made a hen-house eighteen inches long and wide and two feet high, with double roof and a stylish front door ornamented with a glass light several inches square. Painted with glistening chemical it was a skill calculated to inspire the breast of any hen, not given over to free love, with thoughts of home and domestic bliss.

Into this poultry-cottage we introduced three bantams—two hens and a chanticleer. His lordship had not been in his new home more than ten seconds before he crows as lustily as if some one were about to deny the truth; yet it is not probable that this was his idea in giving expression to his feelings, for the world has reached such a high state of liberal moral culture that the liveliest cock on earth could not have the least hope of crowing even once before somebody

would have succeeded in lying three times if not more. Therefore we took it for granted that our jubilant bird was airing his satisfaction in regard to his new-found abode. Indeed, he seemed to say, quite plainly, "I like this 'ere."

## LOCAL NEWS.

CROWDED.—The house of the Union Church of Weymouth and Braintree was crowded last Sunday, all day and evening. Rev. A. A. Ellsworth, the former pastor, occupying the pulpit.

RETURNED.—Rev. James McLean, pastor of the Union Church, South Weymouth, has returned home from his annual vacation, which he spent at Hampden Beach.

KEEPS OFF THE TRACK.—Perhaps some of our readers may not be aware of the statute which forbids persons walking upon a railroad track, but this wise provision of law, which is conducive to the safety of human life, must have been known to a resident of North Weymouth, who while walking at the side of the track of the S. S. R. R., in the cut at Weymouth Landing, last Monday evening, was struck by a locomotive and knocked into the ditch, receiving severe injuries. Don't walk on the track, a fine for every offence.

REV. N. E. WILLIS, of Marion, Ala., formerly of this village, and teacher of the North Weymouth High School, is expected to preach in the Union church, next Sabbath, and will, in the evening, give some of his Southern experiences. Mr. Willis is well and favorably known to a large number of our citizen, who will, no doubt, give him a hearty welcome.

OF THE WEYMOUTH AGRICULTURAL AND INDUSTRIAL SOCIETY.—The Committee on Sports are doing all in their power to make the coming Fair one of the most attractive ever witnessed. The first day will probably see the largest gathering that has ever been in town, Fire Departments having entered for the contest from all parts of the State. Ex-Chief Engineer Damrell is expected to be one of the Judges, and invitations have been extended to all distinguished men of the fair. The second day, in all probability, the Bostons and Athletes will play a match game of ball, as the Committee are laboring to obtain them and this Committee never fail to make their point. The third day will be occupied with ball match between the Actives of S. W. Weymouth and Mutuals of Boston. Walking Matches and Foot Races, both for town people only, and the same thing open to all. The two mile Foot Race has a liberal premium, and is expected to have many contestants.

A splendid Steamer will be in attendance to fill the tank. This part has been attended to by the Committee and the crowd will not have the pleasure of seeing the "Old Mud Turtle" in the procession this year.

PERO.

THE PLEASURES AND TRIALS OF A PICNIC PARTY.—A few citizens of Weymouth, among them a prominent estate agent, (whom we will call Sam), anxious to enjoy a sail among the beautiful islands in Boston harbor, set sail in a fine yacht commanded by an experienced sailor, cruising about until sunset and landing on Sheep Island to indulge a repast of clam chowder and fried tinkers. It being very dark, many difficulties were encountered in cooking but finally supper was announced, when it was discovered that the spoons, knives and forks, fish lines, &c., were missing. Each one helped themselves as best they could, and were served with a bowl of tea, the color of which was blacker than even the dark night. Some said it was too strong, others thought it was a cheap quality of tea; but Sam had already drunk a quart of it, pronouncing it all right and perfectly satisfactory, which quieted further comments on the tea. Soon another pot was called for, when an ominous rattling was heard inside, and on examination all the missing articles were found boiled up among the tea grounds. For convenience in packing these articles had been wrapped in a Boston Herald, put into the pot, and were forgotten (?) Sam had already drunk two quarts of the compound, and his face was a picture for an artist. He wanted to be put on the main land as soon as possible and so pumped out, declaring he would never drink any more tea without examining the pot—

Anchor was weighed immediately, and all arrived home in safety, without further misfortune, and still are happy.

FAMILY GATHERING.—The descendants of Amos Dunbar, of N. Weymouth, met, to the number of 40 or 50, at his residence on Tuesday last, to celebrate the anniversary of his 88th birthday. The Landing representatives were convened, some by Baker & Son's elegant pleasure wagon Phenix, some in private carriages, while others took to the water and floated down on the tide. Boston was represented by way of steamer Massasoit, and South Weymouth, Hingham and Scituate, in private carriages. The weather was auspicious, and the day was spent in roaming along the shore of the lake, river, which is but a few rods from the house, taking bird's-eye views of the landscape and steamers and other craft passing among the islands. Some engaged in the rare sport of digging clams, one lady filling a bucket with her own hands. The "Young American" portion instituted a new way of cooking the clams, by smoking them, but the result not being very palatable, the process is not to be recommended. At 1 o'clock all were summoned to the orchard, where a bountiful table groaned under its load of ham, tongue and other estables. After all were seated under the branches of the trees, something was announced which was not in the bill of fare, viz., one of the best clam chowders ever offered for consumption, the company being indebted to the hostess for this treat.

After satisfying their appetites, all repaired to the house, to sing the following limericks, composed for the occasion by our Weymouth laureate.

Well here we are together met,  
To have a social time;  
Some birds are scarce in blossom yet,  
And ones, tho' strikes well in years,  
Is lively as a lark.

Comes out the chaff, let's give three cheers  
For our old parson.  
Huzza! huzza my dears,  
The birds are here awake,  
And may be live a hundred years,  
And still joy partake.

F. M. ADLINGTON.

Altogether the occasion was a most joyful time the family have ever experienced at these gatherings, and on leaving all expressed the wish that the little song might prove true, and 'as the rolling year comes round, may we be here again.'

A LOOKER ON.

FRUIT AND FLOWERS for the Boston Hospitals may be sent on Wednesday afternoon and evening of next week to the house of Miss Alice Foye, Washington Street.

DEMOCRATIC CAUCUS.—The Democratic caucus of Weymouth held a Caucus at Town Hall, Saturday evening, 29th ult., for the purpose of choosing Delegates to the State Democratic Convention, to be held at Worcester, Sept. 9th. Noble Morse was chosen chairman, and W. W. Burke, Secretary. The following gentlemen were chosen Delegates: Lovell Bicknell, Esq., Alvah Raymond, Jr., Albert Holbrook, W. W. Burke, Henry Newton, Esq., L. H. Loud, A. J. Randall and Edward Nolan. It was voted that any Delegate who could not attend the Convention should have the privilege of sending substitutes in their places. It was the earnest desire of the meeting that the good old town of Weymouth should be fully represented, at that convention.

The following gentlemen were chosen Democratic Town Committee, for the ensuing year: W. W. Burke, A. A. Holbrook, L. B. Tirrell, Martin Burrell and A. P. Nash.

Now is the time to work; the Republicans are divided, Democracy is united. Let us longer put men into office who are corrupt and incompetent, but let us work with a honest purpose and an earnest determination to secure the purer and better days of the Republic. Then rally, one and all; let the present campaign be a "final success."

N. M.

SABBATH SERVICE will be re-commenced in the Baptist Church, Weymouth Landing, next Sunday, the renovation of the interior having been completed. The pews have been grained in black walnut under the skillful hands of Mr. West and assistants, presenting a marked improvement, and the vestry has also been "brushed up" by the painters, Rev. Wm. Carey Wright has accepted the call to the pastorate of the church, and will commence his labors next Sunday.

THE YACHT RACE last Saturday, in Quincy Bay, was won in the first class by Mr. Freeman Whitmarsh's yacht, and the Secret, in the second class, came near being the winning boat, but the allowance of time by the Judge's claimed her defeat.

Braintree.

MRS. ANN STORRS.

Died in Braintree, Aug. 20th, Mrs. Ann Storrs, widow of the late Rev. R. S. Storrs, D. D., aged 81 years, 9 months 5 days. Mrs. Storrs was born at Stratford, Ct., Nov. 13th, 1792, and was the youngest child of Rev. Stephen Storrs, then pastor of the Congregational Church in that town. She was married and came to Braintree in 1835; since that period she has been in the church a shining light, a constant follower of the Master, and like Dorcas of old, "full of good works and alms-deeds." Like her beloved husband, a little more than a year ago she sank gradually away without any apparent disease, enunciating as she went down the dark valley, "I lay myself at Jesus' feet."

Her funeral took place at the meeting-house on Sabbath afternoon, the 20th ult. The solemn services were conducted jointly by Rev. Mr. Emerson and Dr. Blagden, the latter preaching the sermon. At the grave fitting remarks were made by Rev. R. S. Storrs, D. D., of Brookline, N. Y., and a prayer offered by Rev. Henry M. Storrs, D. D., of New York.

The Sabbath School connected with the South Congregational Society under direction of their venerable Superintendent, John Kimball, Esq., made their annual excursion to Long Beach, on Wednesday, the 26th ult. The day was propitious; the company numbering upward of one hundred, were conveyed down by Mr. Cushing of South Weymouth, and Mr. Woodsum, of South Braintree, severally.

The Congregational meeting-house at South Braintree, is receiving a new coat of paint, which adds much to its beauty.

A wild Texan steer, with a long rope around his neck, passed through this town on Washington street, on Wednesday the 26th ult. His ferocious appearance and warlike attitude so frightened the people as he passed, that few none seemed inclined to dispute his master. He went as far as Quincy, where he was shot by a Mr. Glover.

The Sabbath School of the 1st Congregational Society, in charge of their Superintendent, Dea. J. Ward Childs, in company with the Sunday School connected with the Evangelical Society in Quincy, visited Silver Lake Grove in the cars, on Friday, the 26th ult. The day was pleasant and all seemed to enjoy the ride, the beautiful grove, and the sail on the lake.

A large party of friends visited the residence of Mr. and Mrs. J. M. Beals, of Braintree, Tuesday, Sept. 1st, to witness the marriage ceremony of their sister, Mrs. Sallie E. Weed, to Mr. J. Anderson Guild, of Brookline. The ceremony was performed by Rev. E. E. Hale of Boston, after which the party partook of refreshments. All seemed to enjoy themselves and have a very pleasant and joyful time.

After satisfying their appetites, all repaired to the house, to sing the following limericks, composed for the occasion by our Weymouth laureate.

W. C. PHILIPS.

OUR TRIP THERE, AND WHAT WE SAW, WITH A LITTLE SCRAP OF HISTORY.

THIS mountain is the highest point of land in Massachusetts, East of the Connecticut River; its summit being a little more than 2100 feet above the level of the sea. It is a large, round-topped eminence, standing solitary and alone in the center of the State. It is quite easy to ascend, but requires a great deal of strength. The best way to reach the mountain is from the Southeast side, leading from the Mountain House. The best way to reach the mountain from this vicinity is to take the Boston and Albany R. R. to Worcester, and then the Boston, Barre and Gardner R. R., which leads past the Western side, to Princeton. The best way to reach the mountain from this vicinity is to take the Boston and Albany R. R. to Worcester, and then the Boston, Barre and Gardner R. R., which leads past the Western side, to Princeton. The Noname B. B. Club, played a match game of Ball, at South Braintree, on Saturday, Aug. 26th, at the latter place, in which the Nonames sustained their first defeat, by following score.

L. J. SHAW.

[Compiled for the Gazette.]

Ancient Family Records.

ROBERT LOVELL.

Born in Baden, Eng., 1655, Freeman.

His wife was Elizabeth, probably sister of Zach. Bicknell, had children: Zach. born 1620; Anne, born 1619; John, born 1627; married Jane Hatch, 1644; Judith, 1667; Hannah, 1668; Emnoch, 1670; Mary, 1673; John, 1675; Elizabeth, 1676; Joseph, 1684; all born in Weymouth, 1635.

In 1656 he had 34 shares of land in Weymouth.

Elizabeth Lovell was admitted by General Court for her immodest expressions, enjoined to pay witness and was so discharged.

He probably removed to Barnstable with all his children, except James.

James Lovell, 2nd, son of Robert, born in Weymouth, 1635; died 1672, son of Robert, born in Children, Elizabeth, 1666; Deborah, 1644; James, 1667; Hannah, 1668; Emnoch, 1670; Mary, 1673; John, 1675; Elizabeth, 1676; Joseph, 1684, all born in Weymouth, 1635.

In 1656 he had a law suit with Thomas Dyer, same year with John Holbrook and Andrew Ford. He bought a tract of land of Plymouth Colony, two miles long and a mile wide, above Mt. Hatherell, grant and warrant issued to him by the Plymouth Colony, 1656.

## Farm, Garden and Household.

### Household Recipes.

**SAUCE FOR BAKED Pudding.**—Take one pint of flour, a large teacup of sugar, a little nutmeg and essence of lemon, and bring to a boil. Now take a little flour, or corn starch (which is best), well beat into a paste and thinnest, and stir gradually into the consistency of cream, or as thick as you like; then add a large tablespoonful of vinegar or brandy.

**Lemon Curd Pie.**—For two pies take together the yolks of six eggs (well beaten), four heaping tablespoonfuls of white coffee sugar, the grated rinds of three large lemons and about one pint of milk. Bake in one oven on a frosting made of one tea-cupful of cold water, add the grain rinds and the juice of two lemons; mix all together and bake immediately in the oven. For each pie, beat until stiff the whites of two eggs; add two tablespoonfuls of nice sugar; put on this frosting and bake three minutes.

**Canning Peaches.**—A correspondent writes: In canning peaches I have had more experience than with any other fruit. My aim has always been to keep the syrup clear and the peach perfect halves is possible. I have accomplished this by saving some care, but the reward is sure. Put into your kettle two whole eggs, whites and yolks, well beaten together, put four teaspoonfuls of white coffee sugar, the grated rinds of three large lemons and about one pint of milk. Bake in one oven on a frosting made of one tea-cupful of cold water, add the grain rinds and the juice of two lemons; mix all together and bake immediately in the oven. For each pie, beat until stiff the whites of two eggs; add two tablespoonfuls of nice sugar; put on this frosting and bake three minutes.

**Canning Peaches.**—A correspondent writes: In canning peaches I have had more experience than with any other fruit. My aim has always been to keep the syrup clear and the peach perfect halves is possible. I have accomplished this by saving some care, but the reward is sure. Put into your kettle two whole eggs, whites and yolks, well beaten together, put four teaspoonfuls of white coffee sugar, the grated rinds of three large lemons and about one pint of milk. Bake in one oven on a frosting made of one tea-cupful of cold water, add the grain rinds and the juice of two lemons; mix all together and bake immediately in the oven. For each pie, beat until stiff the whites of two eggs; add two tablespoonfuls of nice sugar; put on this frosting and bake three minutes.

**DRIED CURRANTS.**—Take 7 pounds of currants, washed and picked over, to one pound of sugar; boil until the currants can be easily crushed; strain through a cloth, add the sugar for drying; add the currants and the sugar until it is as thick as possible without burning it. Pour upon platters and dry it in a hot sun or in a cool oven. When dry, cut it in pieces and put in a paper bag to use in sickness. A small piece dissolved in a tumbler of ice-water will make a very refreshing drink; or a bit of it added to a cup of tea gives a feeling of refreshment. Dried currants are excellent food for children. Mash the fruit so as to break the skin; cover with white sugar, and with good bread and butter it will be highly relished.

**Summer Felling.**—We have more than once called the attention of our farmers to the advantages of summer felling. If it is an old practice it is still a useful one, and never carried out without great results to the soil. The object is four-fold: to clear the land a rest, to mallow it, to kill the weeds, and to turn under a crop of vegetable matter, which shall go to enrich the soil.

To obtain the best results, the ground should be plowed early in the fall, so that it may absorb the ammonia and other floating gases, and the decomposition of vegetable matter. This will enrich the soil at the start, and the frosts of winter will further pulverize and meliorate it. In the spring, sow to some grain that will make a quick vegetable growth, and when it has reached its greatest growth, just before going to seed, turn under and let it remain. In the fall, when you have your land in, and the ground, and if the next season the land is not in the best condition it has been for years, we shall be very much mistaken as to results. We know one man, in particular, who thus treats his fields every seven years, and he is one of the most successful farmers in Iowa. Try it. It is worthy of your attention.

**Money in Chickens.**—Miss Annie Kirk of Bethel, Penn., is entitled to the praise of being the first lady poultry raiser on record. In 1878 she cleared \$350, after paying all her expenses with eight flocks. She commenced with Cochin Chinas, Brahmas, and other varieties—and found the Cochin and Brahmas the most profitable, being healthier and of speedier growth for the market. An example was given last year of a lady at cord, Mass., who raised a great value of \$350 worth from domestic and common breeds; but this was exceeded by Miss Kirk, whose profits alone are \$350.

**An Inhuman Father.**

Nearly two years ago, Thomas Bunbury was tax collector of Niles, Mich., and defaulter to the sum of \$6,000. He ran away to Texas, where he roamed the country, suffering greater torment than Cain did in the land of Nod. Edward Bunbury (his father) and others were his persecutors.

The County Treasurer began suit against the parties as an attachment on the goods and chattels of Mr. Bunbury, the father. The Sheriff, in this way, made good the deficit. Mr. Bunbury carried the case to the Supreme Court, and obtained judgment against the county for the entire amount and the costs. Meanwhile the county had paid over \$500 for the arrest of Thomas Bunbury.

A short time since the father told Sheriff Waime that he had secured his son, and would turn him over to him on payment of the offered reward. The sheriff demanded the culprit, who the father led him to his residence. Upstairs, in a small and uncomfortable bedroom, prostrate in the last stage of consumption, pale and emaciated, lay the young man. His face showed plainly that he had suffered severely from his disease; but the pangs of conscience and the marks of anguish and furrows of remorse upon his pallid face, spoke more clearly the cause of his ruined health.

"Here is the young man," said the persecuting father. "I now demand the reward that is justly due me." The young man says he has been confined there for three or four months, and stated certain facts to prove the truth of his assertion. Marshal Clancy says that if the young man speaks the truth his father has had the boy concealed in the house for four months at least.

The sheriff said that the defaulter would be arrested, but that it was impossible to remove him from where he was, and that it was very difficult whether he could ever be removed until he was carried out in his last resting place.

It is at a certain time every pleasant night, while the patient comsire, he had been taken out for an airing, but now that he was beyond all hope, his father had determined to sell him for what he was worth.

**TRIAL OF LAWYERS' LEGS.**—This is more useful than "leg-ball," which means dredging justice. A curious mode of trying the title to land is practiced in Madras. Two holes are dug in the disputed spot, in each of which the plaintiff's and defendant's lawyers put one of their legs, and remain there until one of them is tired, in which case his client is defeated.

If this method prevailed in our courts, perhaps fewer clients would "get their feet in it" than do now.

### A Congressman Gives a Treat.

A Washington Territory paper tells the following story of the newly-elected Congressman there, who is noted for nothing but being a real scoundrel. When his constituents election were poor he promised that if elected he would give his friends an oyster supper when he had promised, and strictly an oyster supper was what he provided. There were none of the *et ceteras* that usually accompany a feast of that kind, and nothing to drink with wine, coffee, or anything else weaker or stronger, except oysters and oyster soup. He borrowed the use of the barber shop and cooked the oysters himself. But at the establishment was not arranged with an especial view of accomodating oyster parties, the tubs were too large to make the soup in one hit, and upon the cheap expedient, and went to a Chinese wash-house and borrowed a wash boiler for a soup kettle.

**Lemon Custard Pie.**—For two pies take together the yolks of six eggs (well beaten), four heaping tablespoonfuls of white coffee sugar, the grated rinds of three large lemons and about one pint of milk. Bake in one oven on a frosting made of one tea-cupful of cold water, add the grain rinds and the juice of two lemons; bake till the frosting is a pale brown.

**Lemon Custard Pie.**—For two pies take together the yolks of six eggs (well beaten), four heaping tablespoonfuls of white coffee sugar, the grated rinds of three large lemons and about one pint of milk. Bake in one oven on a frosting made of one tea-cupful of cold water, add the grain rinds and the juice of two lemons; bake till the frosting is a pale brown.

## PROTECT YOUR BUILDINGS!

which may be done with one-fourth the usual expense by using

GLINE'S PATENT SLATE ROOFING PAINT!

AGENTS WANTED IN EVERY TOWN.

A roof may be covered with a very cheap shingle, and by application of this slate to last from 20 to 25 years. Old roofs can be patched, looking much better, and lasting longer than new shingles without the state for.

One-Third the Cost of Re-Shingling.

The expense of slating new shingles is only about the cost of simply laying them. The Paint is FIRE-PROOF against sparks or flying embers, as may be easily tested by any one, and appears from the fact that Insurance Co's make need for it.

Same Tariff as for Slated Roofs.

Weymouth Weekly Gazette  
AND BRAINTREE REPORTER.

PUBLISHED EVERY FRIDAY AT  
Weymouth, Norfolk Co., Mass.

C. G. EASTERBROOK, Proprietor.

## Items of Interest.

Large numbers of Indians are said  
to be employed in the Oregon harvest  
fields.

The railway system of the United  
States represents a capital of \$8,000,  
000,000.

There is a horse at Williamsport, Pa.,  
which has hauled 30,000 tons of coal in  
25 years.

We are judged by the meanness of our  
actions, not by the nobleness of our  
thoughts.

A lady in Mobile has been badly po-  
isoned while cleaning a silk dress with  
fig-leaf tea.

It is stated that in future French  
packet ships will be commanded by  
naval officers.

In the Boston Public Library there  
are 218,000 volumes, with 40,000 more  
in the branches.

It has been noticed that nothing  
makes a woman laugh so much as a  
new set of teeth.

Sheep in Abenquerque, Col., bring  
out 50 per head, and the owners  
are glad to get that.

The Omnibus company of London,  
estimate their annual loss by conduct-  
ors' stealing, at the handsome sum of  
\$150,000.

A church trustee was shot dead in  
Caroline, Ky., by a disturber of public  
worship whom the deceased was trying  
to put out.

The father of a four-legged girl has  
left California in disgust, not being  
permitted to exhibit her juvenile curios-  
ity in that State.

An association of wealthy citizens  
has been formed in California for the  
purpose of lending money to poor and  
deserving students.

An Indianapolis fireman claims the  
championship in melon eating. In five  
hours and three-quarters he ate seven-  
teen and three-quarter mush melons, and,  
stranger still, he lives to tell the  
tail.

Some singers at a concert were some-  
what afraid to sing, even by

that the selection. "When I never  
had wretches sink to sleep," had been  
printed on the programme, "When  
married wretches," etc.

Commodore Vanderbilt wears woolen  
socks all the year round, and attributes  
his uninterrupted good health to that  
fact. The Commodore claims that they  
prevent the escape of electricity, which  
is known to be a powerful physical  
commodity.

A gentleman undertook for a wager  
to stand for a whole day on London  
bridge with a tray full of good sterling  
sovereigns, and would fail to find cus-  
tomers for them at a penny apiece;  
but thought he was trying to cheat them  
with brass imitations.

Recently a shooting match was ar-  
ranged to take place at Eastbourne,  
England, between a fisherman and a  
massiff. But there was no race, be-  
cause the dog, once in the water with  
the man, supposed his duty there was  
to save the latter's life, and persisted  
in his endeavors to keep the man afloat  
by thrashing his head under his oppo-  
nent's chin.

A fisherman in Virginia city, Neva-  
da, won his crop from the grasshop-  
pers by a six weeks' fight. His grain  
is surrounded by an irrigating ditch,  
and when the grasshoppers began to  
eat it, he covered the field with water,  
and kept it there till the insects were  
drowned. His neighbors suffered se-  
verely from insects.

A shower of white toads took  
place in Larimer county, Col. The  
shower embraced a strip of country half  
a mile wide and several miles in length.  
From a distance the frogs, as they  
bounced along the ground, looked for  
all the world like hail stones. After  
the storm the frogs hopped over the  
country, leaving about ten thousand.

It was a bold concerning a storm on  
Lake Erie, when one of the passengers  
was bemoaning the critical state in  
which the vessel and its passengers  
were then placed, and asked a friend if  
the captain did not think the vessel

was in great peril. The reply was that  
he thought the vessel would be safe  
right off, but could not be sure. "Yes,"  
said the friend, "but I am in deep  
water." "Why," said the terrified one,  
"can't we drown just as well in deep  
water as we can in shallow?" "Yes,"  
was the reply, "but you know if we  
keep in deep water, when the vessel  
rolls over the masts won't stick fast in  
the mud on the bottom and hold us  
down."

**Domestic Economy.**  
If the husband wishes a good dinner  
he may give his wife a good place to  
cook in, which should be  
easily comfortable and convenient,  
especially in winter. No woman  
can do good cooking unless she has all  
the utensils and appliances. One of  
the latest improved cooking stoves or  
ranges is indispensable. No woman  
out cooking apparatus should find a  
place in her kitchen. A woman may  
have one of the greatest experts in all  
manner of cookery, yet if she is desti-  
tute of proper fixtures and materials,  
she will necessarily fail in her attempts.

Good fuel is the first importance for  
this class of cookery. Coal is em-  
braced within it, and pure air and water  
becomes a necessary result of the opera-  
tion. It is a true saying that "a  
housewife is a woman of many talents,"  
and that she who is possessed of  
them all, can care for her home  
well. Nature always supplies  
whatever is wanted, and a woman  
should be a good housewife, and  
make a good meal for her family.

Those who are naturally disposed  
to the art of cookery, have a habit to become  
unconsciously in their houses, cannot be  
compulsorily cured by law. We are  
quite convinced that if cleanliness  
among certain classes is to be insured,  
only one course will be effectual, and  
that is by avoiding the dirt and  
filthiness of the house. When the  
gentleman who constructed a carriage  
for the Indian method of transpor-  
tation, he contrived a "carriage"  
in the following manner: Lashing a  
pole on each side of a pony, secured to  
the pack-saddle while the other end  
dragged upon the ground, the driver  
steered the animal, and taking the man  
upon his shoulders started away. Once only  
in that long travel did the pony stop,  
when the Indian, who was riding upon  
the pole, seized the animal by the tail,  
and, after pulling him around, lashed him  
to the pole, and then lashed the pony  
again, so that the animal was turned  
around, and then carelessly threw the  
pony through his body from the six-shooter.  
Instantly he grabbed his tail and  
discharged with his left hand. Instantly  
she seized his tail and bit through  
his right ear. She then tore away part  
of Jesse's upper jaw and a piece of  
the scalp five inches wide by nine inches  
long. She fell back upon Bill's legs,  
who rolled her off, and then took his  
knife and cut off the piece of Jesse's  
jaw (with the skin) and then cut  
off the rest of the scalp, the ragged  
ends of which remained on the scalp,  
and was endeavoring to dress his  
wounded foot, when the yearling bear  
appeared upon the scene only a few  
feet away. It was the work of an instant  
to seize his rifle and shoot the bear  
through the heart. When the  
gentleman who constructed a carriage  
for the Indian method of transpor-  
tation, he contrived a "carriage"  
in the following manner: Lashing a  
pole on each side of a pony, secured to  
the pack-saddle while the other end

to the pole, and then lashed the pony  
again, so that the animal was turned  
around, and then carelessly threw the  
pony through his body from the six-shooter.  
Instantly he grabbed his tail and  
discharged with his left hand. Instantly  
she seized his tail and bit through  
his right ear. She then tore away part  
of Jesse's upper jaw and a piece of  
the scalp five inches wide by nine inches  
long. She fell back upon Bill's legs,  
who rolled her off, and then took his  
knife and cut off the piece of Jesse's  
jaw (with the skin) and then cut  
off the rest of the scalp, the ragged  
ends of which remained on the scalp,  
and was endeavoring to dress his  
wounded foot, when the yearling bear  
appeared upon the scene only a few  
feet away. It was the work of an instant  
to seize his rifle and shoot the bear  
through the heart. When the  
gentleman who constructed a carriage  
for the Indian method of transpor-  
tation, he contrived a "carriage"  
in the following manner: Lashing a  
pole on each side of a pony, secured to  
the pack-saddle while the other end  
dragged upon the ground, the driver  
steered the animal, and taking the man  
upon his shoulders started away. Once only  
in that long travel did the pony stop,  
when the Indian, who was riding upon  
the pole, seized the animal by the tail,  
and, after pulling him around, lashed him  
to the pole, and then lashed the pony  
again, so that the animal was turned  
around, and then carelessly threw the  
pony through his body from the six-shooter.  
Instantly he grabbed his tail and  
discharged with his left hand. Instantly  
she seized his tail and bit through  
his right ear. She then tore away part  
of Jesse's upper jaw and a piece of

FRIDAY, SEPT. 28, 1874.

## Tenth Annual Fair

OF THE  
WEYMOUTH AGRICULTURAL AND  
INDUSTRIAL SOCIETY.

The mist and cloud which enveloped this region of country during the three days of the Weymouth festival was a serious drawback in the matter of attendance on Friday and Saturday, and the large receipts of the first day, which was occupied with the Firemen's Muster, only saved the Society from an financial loss. The gathering of Thursday, an account of which we gave last week, was a decided and brilliant assembly of fine sharpers, and the general satisfaction prevailing among them from the prompt and faithful performance of their duties by the Judges of whom Ex-Chief Daniel of Boston, was Chairman made the occasion very gratifying to all concerned. From the time that the playing was commenced until its close, the steaming vapor furnished an abundant supply of water, and without any break in the order of playings, the Contests rapidly took their positions and manfully struggled for the honors of the day. The play was concluded about 6 P.M., when Judge Daniels mounted the stand and announced to the large assemblage that the Torrent Engine of Peabody had taken the first prize of \$200, having played 204 feet, 11 3/8 inches; Eureka, 190; Hurlford, 187; and Gladiolus, 186, with a basket of 62 Gladoli.

Other exhibitors were Mrs. Vining, basket of cut flowers; Miss Emily T. White, dish of flowers; Mrs. E. D. Raymon, an unusually fine dish of Gentians; Mrs. R. K. Benson, fine bouquet; Mrs. J. C. Cobb, Globe Amaranth; Mrs. Daniel Lovell, Amaranth; Mrs. R. C. Weston, Amaranth. Miss R. Brook furnished a water color picture, Miss Mary A. Prater a worsted picture, and Miss Lillian Green exhibited specimens of water colorings, in autumn leafings, very delicate and finely drawn. Miss Kate Parker exhibited a crayon likeness of Rev. Father Huskins, of Boston; Lizzie M. Thomas a nice pastel drawing, and Charles S. Joy a handsome chromo lithograph, "No place like Home," enclosed with flowers.

Chamberlain, photograph artist at Weymouth Lake, was a large contributor in his department of art, and his pictures were much admired. They exhibited several outdoor views, colored and card photos and 8x10 pictures, among them a striking likeness of the late Rev. Jonas Perkins.

Mrs. Tyler Poole was also a lavish contributor in this department, exhibiting 41 varieties of Petunias, 54 of Pansies, 26 of Gladiolus, 10 mums, with a basket of 62 Gladoli.

Other exhibitors were Mrs. Vining, basket of cut flowers; Miss Emily T. White, dish of flowers; Mrs. E. D. Raymon, an unusually fine dish of Gentians;

Mrs. R. K. Benson, fine bouquet; Mrs. J. C. Cobb, Globe Amaranth; Mrs. Daniel Lovell, Amaranth; Mrs. R. C. Weston, Amaranth.

The general features of the flower show were a variety of ornamental leaf plants, and mosses and ferns, but was not so full in blossoming plants as in previous years. The cut flowers averaged about the same at last year, and on the whole the department may be credited with an exhibition highly satisfactory to the Society and the visitors.

Mrs. Silas Gardner (whose flower gardens at Weymouth is one of the attractions) of the town, and will richly repay our readers in an examination of its beauties, was awarded first premium in the play of the Columbian of Brockton, which should have read 18' feet 3 1/4 inch.

As soon as the announcement was made, the engines were drawn from the ground, and sent to the depot for transportation on the cars, while those from towns to the west were hauled home by horses. The Tiger Engine Co. of Quincy, which was manned by a sturdy hundred of granite cutters, passed through the town with a couple of brooms trailing in the road, waggish significations of their defeat, which bore with such remarkable good humor that at their banquet in that place the same evening they received a check for \$250.00 from Henry H. Faxon, Esq., in appreciation of their orderly and gentlemanly conduct.

Many of the visiting firemen remained in the town to participate in the social parties given by the Conqueror and Union Co.'s, and received cordial attention from the citizens. The Committee in charge of the affairs of the festival felt that it had been well repaid for their labor by the perfect success of the Muster, and retired from the "field of action" with the "honors all easy."

The second day dawned with portentous accompaniment of drizzle which indicated a small attendance of visitors, but the programme of the day was entered upon with a determination to make the occasion as interesting as possible and at A. M. the basin in the Exhibition of Horses were in order, premiums being awarded as follows:

TROTTING, &c.  
Class 1. Brood Mares.—J. F. Cushing, 1st; Wm. H. Clapp, 2d; 5; Z. P. Jordan, 2d.

Class 2.—No entries.—Alfred Spiedale, 1st.

Class 4. 2 entries.—F. A. Gardner, 1st; 5; J. Salisbury, 4d.

Class 5. Colts 2 yrs. old.—W. W. Barrows, 1st; 6; C. Morrill, 2d; 4; C. Oakman, Marshfield, 3d; S. C. Terry, 2d.

Class 6.—No entries.

Class 7. Family Horses.—Alvah Raymond, Jr., 1st; 8; E. Bennett, 2d; 6; W. Shaw, 3d; pr. 4.

Class 8. Matched.—J. S. Fogg, 1st; \$8; E. Bennett, 2d; 5.

Class 9. Dray Horses.—Otis Cushing, 1st; 5; 2d; Moore, 2d; 4.

Class 10.—No entries.

Class 13. Gents' Driving Horses.—E. Bennett, Brockton, Gold Dust, 1st, time 2:38, 2:50 1/2, 2:52 1/2, \$20; J. C. Richards, South Weymouth, Lady Canterbury, 2d, \$10; E. Derby, Lady Messenger, 3d, \$5.

Class 15. Gents' Driving Horses.—Wm. Burtt, Jessie Thompson, 1st, time 2:48, 2:50, \$35.

At 2 P.M. the grand Base Ball Match between the Howards, of Brockton and King Phillips of Rockland commenced. The rain, however, was too much for the ballists, and the play was seriously marred. The attendants who were in good health in the Hall found abundant occupation in an examination or curation in the various departments, which in the main, was fully equal to previous shows, and especially superior in the show of appliances, there being 403 plates of apples, 308 of pears, with 72 of grapes and 400 peaches. At the Worcester County show the same week the number of plates of pears was 200, and of apples, 400, while shows that Weymouth exhibits were more profuse in their contributions in these departments than were those of the whole county of Worcester, which is doing well for single town. The displays of E. D. Raymond, Ebenezer Northey, Josiah Reed, Oran White, B. L. Morrison, Thomas Bicknell, Loring Pratt, John P. Lovell, M. C. Dizer, E. S. Hunt, John Reed, B. L. Morrison, Albert T. F. S. Torrey, E. T. Joy, Royal Hospital Nursery, A. H. Wright, being the leaders, in apples and pears, was very fine, while the numerous collections of single plates added greatly to the attractions of these departments by the large number of varieties displayed. An enumeration of the lengthy list of exhibitors would require a large amount of space, so refer the reader to the premium list appended to this report for further particulars. Grapes did not figure so largely in the exhibition as in former years, due to the prevailing blight, but there were many fine specimens, while peaches were superior in quality and quantity. Francis S. Torrey's display of grapes of open culture was excellent for the season, and took the first prize. A new and pleasing feature of the display of gourds and melons, contributed by Alfred Tuck, F. S. Torrey, Dr. Tuck, and remarkable specimens of pears were furnished by Mrs. Dr. Tuck, and Eric T. Joy, the former showing a plate of mammoth Bartletts and the latter two plates of large Beure Claveaux.

Handsome melons were contributed by Barnes Bros., Loring Pratt, John Rankin and Oran White, and Hon. F. W. White and Mr. Holloman exhibited lots of Cranberries of fine quality.

For fear that we may be accused of drawing invidious distinctions, we turn to the tempting burdens of the fruit tables to the department of Fancy articles, where we find the pleasing and abundant contributions of Mrs. S. Silas Gardner, Mrs. Tyler Poole, Messrs. Geo. Hulme and Albert Hilliard, the more prominent beauties of the floral exhibition. Mrs. Gardner's collection embraced ten varieties of Gillies, fourteen of Aster, eleven of Zinnias, eighteen of Dahlias, eleven of Phlox, six of Salvia, six of Lantana, forty-two varieties of Seedling Verbena, and Colours, Tree Begonias, Crystanthemum, Coleus, Crepea, Hawkeye, etc. Her basket of flowers was, as ever before, highly praised by visitors, many of whom expressed their surprise that it was not awarded the first premium.

Mrs. Tyler Poole made a beautiful dis-

play of forty-one varieties of Petunias, fifty-four of Pansies, twenty-six of Gladoli, also Dahlias and bouquet.

Mr. Geo. Hollis exhibited fifty pots of plants, fifty bottles of cut flowers in ornamental display, besides a large variety of single specimens. His models for beauty and variety in the long list of plants with unpronounceable names, would weaken the jaws of our readers in an attempt to give utterance to their vocabulary. The peculiar feature of Mr. Hollis's show was that the flowers exhibited by him were all grown out of doors, no greenhouse plants being shown, and for this reason he is entitled to great praise, since the plants being tender and requiring a certain degree of care and watchfulness in production. Among his specimen plants were eight varieties of Sedum, on which he took the first premium for specimen plants, the collection being very fine. Mr. Hollis exhibited two new plants, Golden Sage and Gnaphalium; also two or two dozen of Selaginella; 3 pieces Chiosinia, 3 pieces Begonia; 1 piece, and two or two dozen of various plants. A handsome basket of flowers grown out of doors also graced his exhibit.

Albert Turrell had a fine collection of cut flowers, among which was a profusion of Roses. His exhibition of pot plants was equally good, and the plants being tender and requiring a certain degree of care and watchfulness in production. Among his specimen plants were eight varieties of Sedum, on which he took the first premium for specimen plants, the collection being very fine. Mr. Hollis exhibited two new plants, Golden Sage and Gnaphalium; also two or two dozen of Selaginella; 3 pieces Chiosinia, 3 pieces Begonia; 1 piece, and two or two dozen of various plants. A handsome basket of flowers grown out of doors also graced his exhibit.

Five Pupils, \$3.00

etc.

Prof. Guillet hopes that his very low terms

will be his best endeavor to enable his pupils to spread

English in a short time, we sec-

ondary.

EDWARD DEXTER,

Clerk of the district court for said distric-

tion.

PROF. A. GUILLET,

300 Heath Street, Boston Highlands.

#### East Norfolk Court Report.

Josiah R. Gilbert, of Weymouth, on

complaint of F. B. Vinson for being drunk,

and fined \$3 costs.

Catharine Feeney, of Braintree, fined

\$10 and costs, and imprisoned in the

House of Correction for the term of twenty days,

for introducing liquors. From

she appealed.

Patrick Sheridan, of Quincy, for being

drunk at Quincy on the fifth day of Sept.

Plead guilty and was fined \$3 and costs.

Thomas Willister, of Cohasset, for be-

ing drunk. Plead guilty and was fined

\$3 and costs.

Thomas H. Hayes, of Quincy, for an

assault on Mrs. Manger. Found guilty,

and paid a fine of \$15 and costs.

Timothy Coffey, of Quincy, for an as-

sault on James Mahoney. Case continued

until Saturday.

Bryan O'Connor, Peter Sullivan and

wife, and Morris Collett were arrested

for a general riot--such one, for himself

as the law required, but all were dis-

charged except Peter Sullivan, who was

fined \$5 and costs.

Superior Court.—Timothy F. Reardon

of Medway, arraigned for maintaining

a "liquor nuisance" on three com-

plaints, pleaded guilty to selling, with

the conditions that if the other two

complaints were dismissed, he would

be fined \$100 and costs.

The people, however, insisted that

he should be fined \$1000 and costs.

Edward Mahan, of Weymouth, for an

assault, plead not guilty, but was fined

\$20 and costs.

Superior Court.—Timothy F. Reardon

of Medway, arraigned for maintain-

ing a "liquor nuisance" on three com-

plaints, pleaded guilty to selling, with

the conditions that if the other two

complaints were dismissed, he would

be fined \$100 and costs.

The people, however, insisted that

he should be fined \$1000 and costs.

Edward Mahan, of Weymouth, for an

assault, plead not guilty, but was fined

\$20 and costs.
